

Outgoing

Hard-working

Goals

- Group study for a few hours inbetween classes
- To be one of the top graduates

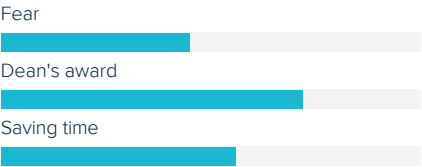

Frustrations

- Limited study area at university
- Walking through every level to look for available space
- Problems with the available solutions.

Bio

Nick goes to UTS study Engineering. The majority of his classes are in Building 11. He has a rather long day of university 4 days a week, where he has a class in the morning, and another in the evening, leaving him free in the middle of the day. So he doesn't like to travel back home and then return to UTS in the evening to attend his class. Therefore he usually schedule his group meeting in that time period. However, he can't seem to find any available area for him and his group to study. Also, since his group can get a bit loud sometimes, so he doesn't like to go to the library.

Motivation

Dislikes

- Library because it is far from his building
- Being loud in an quiet area
- Going back home in the middle of the day and come back to uni in the evening

Likes

- Group meeting in an open area
- To use technology to obtain information
- Planning his week
